Item Body

Dear Jim,

Thank you for a copy of the 2006-2007 Annual Report Documenting the Implementation of the Operations and Maintenance Plan at the Former Heckathorn NPL Site (Environmental Technical Services).

I noted that the analytical testing did not include Pesticides (EPA Method 8081) or Semivolatile compounds (EPA Methods 8270) which would have indicated if DDT was present in stormwater samples.

In addition, I looked at the 2005-2006 Annual Report. Pesticides results were missing in several stormwater samples (collection dates were November 29, 2005, March 8, 2006 and May 23, 2006).

Would you please let me know the rationale for deleting pesticides from the suite of analysis? Thanks.

Sharon Lin, P.E.
